

## Product Specification Sheet

**The Baby Hand Casting Kit** includes everything necessary to make a baby hand cast (Newborn to about 6 months).

When you're done, you'll have a hard stone, three-dimensional sculpture of your baby's hand.

All you add is water. "Mix-In-The-Bag" technique makes mixing and cleanup a snap.

*As a BONUS*, we even put in a second bag of HandGEL alginate in case the first one doesn't come out well. Ideally babies should be very calm or asleep for this procedure.

<b>Baby Hand Casting Kit includes:</b>
Two 3 oz. bags of HandGEL alginate
One 8 oz. bag of LifeCAST gypsum cement
Thermometer
Molding Bucket
Small "Fix the Cast" Kit
Illustrated Procedural Guide
