

Product Specification Sheet

The Child Hand Casting Kit includes everything necessary to make a child hand cast (6 months to about 6 years).

When you're done, you'll have a hard stone, three-dimensional sculpture of your child's hand.

All you add is water. "Mix-In-The-Bag" technique makes mixing and cleanup a snap.

As a BONUS, we even put in a second bag of HandGEL alginate in case the first one doesn't come out well. Ideally child should be very calm for this procedure.

(NOTE: Please be aware that between 6 months and 3 years is a particularly difficult period in a child's life for hand casting because they don't understand WHY they're doing it.)

Child Hand Casting Kit includes:
Two 6 oz. bags of HandGEL alginate
One 18.4 oz. bag of LifeCAST gypsum cement
Small "Fix the Cast" Kit
Thermometer
Plastic molding bucket
Illustrated Procedural Instructions
